

**SB 183 - New California Law Requires Homes To Have Carbon Monoxide
Detectors
Effective July 1, 2011**

This law revises the TDS and MHTDS to include a disclosure regarding compliance with the smoke detectors and water-heater bracing laws (eliminating the need for separate disclosure forms). The TDS and MHTDS will also add a disclosure regarding carbon monoxide detection devices.

This law enacts the Carbon Monoxide Poisoning Prevention Act of 2010. The law requires a carbon monoxide device (battery or hard-wired) to be installed in a "dwelling unit intended for human occupancy." A violation is punishable by a maximum fine of \$200 for each offense. Owners of residential rental property must also comply with this law. Tenants are responsible to notify the owner of an inoperable or deficient carbon monoxide device.

Installation Time Period:

- On or before July 1, 2011 for existing single-family dwelling units
- On or before Jan. 1, 2013 for all other existing dwelling units

Amends Sections 1102.6 and 1102.6d of the CA Civil Code and adds Sections 13260, 13261, 13262, 13263, 17926, 17926.1, and 17926.2 to the CA Health and Safety Code.

Senate Bill No. 183

CHAPTER 19

An act to amend Sections 1102.6 and 1102.6d of the Civil Code, and to add Sections 17926, 17926.1, and 17926.2 to, and to add Chapter 8 (commencing with Section 13260) to Part 2 of Division 12 of, the Health and Safety Code, relating to residential building safety.

[Approved by Governor May 7, 2010. Filed with Secretary
of State May 7, 2010.]

LEGISLATIVE COUNSEL'S DIGEST

SB 183, Lowenthal. Residential building safety.

(1) Existing law requires certain transferors of real property improved with 1 to 4 dwelling units, as well as transferors of mobilehomes and manufactured homes, to make specified disclosures to prospective transferees regarding the characteristics of the property and prescribes forms for the purpose of making these disclosures. Existing law requires the transferor of real property containing a single-family dwelling to provide transferees written notice of compliance with specified requirements for the installation of smoke detectors. Existing law requires the seller of any real property containing a water heater to certify in writing to a prospective purchaser compliance with specified safety requirements related to those water heaters.

This bill would revise the disclosure forms, described above, to provide a seller certification that the property, at the close of escrow, will be in compliance with the requirements for smoke detectors and water heaters, described above, and to remove these provisions from elsewhere in the forms. The bill would also revise the disclosure forms to add a disclosure regarding carbon monoxide devices and a statement specifying that installation of a listed appliance, device, or amenity is not a precondition to sale or transfer.

Existing law requires the State Fire Marshal to adopt regulations and standards regarding the quality and installation of burglar bars and safety release mechanisms for emergency escape and rescue windows, the approval and installation of smoke detectors, and the approval of portable fire extinguishers for marketing, distribution, and sale in this state. Existing law requires a smoke detector approved and listed by the State Fire Marshal to be installed in a dwelling unit intended for human occupancy. The State Housing Law creates standards for buildings used for human habitation. A violation of that law is a misdemeanor.

This bill would enact the Carbon Monoxide Poisoning Prevention Act of 2010. This bill would require the State Fire Marshal to certify and approve carbon monoxide devices and their instructions, as specified, for the use in dwelling units intended for human occupancy, as defined. The bill would

require the State Fire Marshal to charge an appropriate fee to the manufacturer of a carbon monoxide device to cover the costs associated with the approval and listing of carbon monoxide devices. The bill would prohibit the marketing, distribution, or sale of devices unless they and their instructions have been approved and listed by the State Fire Marshal. The bill would require a carbon monoxide device to be installed in a dwelling unit intended for human occupancy, as specified, and would generally provide that a violation of these provisions is an infraction punishable by a maximum fine of \$200 for each offense, but the bill would require that a property owner receive a 30-day notice to correct prior to the imposition of the fine. By creating a new crime, this bill would create a state-mandated local program. The bill would provide that a transfer of title is not invalidated on the basis of a failure to comply with these requirements, and that the exclusive remedy for the failure to comply is an award of actual damages not to exceed \$100, exclusive of any court costs and attorney's fees.

This bill would require an owner or the owner's agent of a dwelling unit intended for human occupancy who rents or leases the dwelling unit to a tenant to maintain carbon monoxide devices in that dwelling unit. The bill would permit the owner or the owner's agent to enter that dwelling unit to install, repair, test, and maintain carbon monoxide devices, as specified. The bill would permit the Department of Housing and Community Development to suspend enforcement of certain requirements on property owners if the department, in consultation with the State Fire Marshal, determines that a sufficient amount of tested and approved carbon monoxide devices are not available, and would require the department to publicize this decision, as specified. The bill would also make a statement of legislative findings.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The people of the State of California do enact as follows:

SECTION 1. Section 1102.6 of the Civil Code is amended to read:

1102.6. The disclosures required by this article pertaining to the property proposed to be transferred are set forth in, and shall be made on a copy of, the following disclosure form:

REAL ESTATE TRANSFER DISCLOSURE STATEMENT

THIS DISCLOSURE STATEMENT CONCERNS THE REAL PROPERTY SITUATED IN THE CITY OF _____, COUNTY OF _____, STATE OF CALIFORNIA, DESCRIBED AS _____. THIS STATEMENT IS A DISCLOSURE OF THE CONDITION OF THE ABOVE DESCRIBED PROPERTY IN COMPLIANCE WITH SECTION 1102 OF THE CIVIL CODE AS OF _____, 20____. IT IS NOT A WARRANTY OF ANY KIND BY THE SELLER(S) OR ANY AGENT(S) REPRESENTING ANY PRINCIPAL(S) IN THIS TRANSACTION, AND IS NOT A SUBSTITUTE FOR ANY INSPECTIONS OR WARRANTIES THE PRINCIPAL(S) MAY WISH TO OBTAIN.

I

COORDINATION WITH OTHER DISCLOSURE FORMS

This Real Estate Transfer Disclosure Statement is made pursuant to Section 1102 of the Civil Code. Other statutes require disclosures, depending upon the details of the particular real estate transaction (for example: special study zone and purchase-money liens on residential property).

Substituted Disclosures: The following disclosures and other disclosures required by law, including the Natural Hazard Disclosure Report/Statement that may include airport annoyances, earthquake, fire, flood, or special assessment information, have or will be made in connection with this real estate transfer, and are intended to satisfy the disclosure obligations on this form, where the subject matter is the same:

- Inspection reports completed pursuant to the contract of sale or receipt for deposit.
- Additional inspection reports or disclosures:

II

SELLER'S INFORMATION

The Seller discloses the following information with the knowledge that even though this is not a warranty, prospective Buyers may rely on this information in deciding whether and on what terms to purchase the subject property. Seller hereby authorizes any agent(s) representing any principal(s) in this transaction to provide a copy of this statement to any person or entity in connection with any actual or anticipated sale of the property.

THE FOLLOWING ARE REPRESENTATIONS MADE BY THE SELLER(S) AND ARE NOT THE REPRESENTATIONS OF THE AGENT(S), IF ANY. THIS INFORMATION IS A DISCLOSURE AND IS NOT INTENDED TO BE PART OF ANY CONTRACT BETWEEN THE BUYER AND SELLER:

SEC. 3. Chapter 8 (commencing with Section 13260) is added to Part 2 of Division 12 of the Health and Safety Code, to read:

CHAPTER 8. CARBON MONOXIDE POISONING PREVENTION ACT OF 2010

13260. This chapter shall be known and may be cited as the Carbon Monoxide Poisoning Prevention Act of 2010.

13261. The Legislature finds and declares all of the following:

(a) According to the American Medical Association, carbon monoxide is the leading cause of accidental poisoning deaths in the United States. The federal Centers for Disease Control and Prevention estimate that carbon monoxide kills approximately 500 people each year and injures another 20,000 people nationwide.

(b) According to the United States Environmental Protection Agency, a person cannot see or smell carbon monoxide. At high levels carbon monoxide can kill a person in minutes. Carbon monoxide is produced whenever any fuel, such as gas, oil, kerosene, wood, or charcoal, is burned.

(c) The State Air Resources Board estimates that every year carbon monoxide accounts for between 30 and 40 avoidable deaths, possibly thousands of avoidable illnesses, and between 175 and 700 avoidable emergency room and hospital visits.

(d) There are well-documented chronic health effects of acute carbon monoxide poisoning or prolonged exposure to carbon monoxide, including, but not limited to, lethargy, headaches, concentration problems, amnesia, psychosis, Parkinson's disease, memory impairment, and personality alterations.

(e) Experts estimate that equipping every home with a carbon monoxide device would cut accident-related costs by 93 percent. Eighteen states and a number of large cities have laws mandating the use of carbon monoxide devices.

(f) Carbon monoxide devices provide a vital, highly effective, and low-cost protection against carbon monoxide poisoning and these devices should be made available to every home in California.

(g) The Homeowners' Guide to Environmental Hazards prepared pursuant to Section 10084 of the Business and Professions Code is an important educational tool and should include information regarding carbon monoxide. It is the intent of the Legislature that when the booklet is next updated as existing resources permit, or as private resources are made available, it be updated to include a section on carbon monoxide.

13262. For purposes of this chapter, the following definitions shall apply:

(a) "Carbon monoxide device" means a device that meets all of the following requirements:

(1) A device designed to detect carbon monoxide and produce a distinct, audible alarm.

(2) A device that is battery powered, a plug-in device with battery backup, or a device installed as recommended by Standard 720 of the National Fire

Protection Association that is either wired into the alternating current power line of the dwelling unit with a secondary battery backup or connected to a system via a panel.

(3) If the device is combined with a smoke detector, the combined device shall comply with all of the following:

(A) The standards that apply to carbon monoxide alarms as described in this chapter.

(B) The standards that apply to smoke detectors, as described in Section 13113.7.

(C) The combined device emits an alarm or voice warning in a manner that clearly differentiates between a carbon monoxide alarm warning and a smoke detector warning.

(4) The device has been tested and certified, pursuant to the requirements of the American National Standards Institute (ANSI) and Underwriters Laboratories Inc. (UL) as set forth in either ANSI/UL 2034 or ANSI/UL 2075, or successor standards, by a nationally recognized testing laboratory listed in the directory of approved testing laboratories established by the Building Materials Listing Program of the Fire Engineering Division of the Office of the State Fire Marshal of the Department of Forestry and Fire Protection.

(b) “Dwelling unit intended for human occupancy” means a single-family dwelling, factory-built home as defined in Section 19971, duplex, lodging house, dormitory, hotel, motel, condominium, stock cooperative, time-share project, or dwelling unit in a multiple-unit dwelling unit building or buildings. “Dwelling unit intended for human occupancy” does not mean a property owned or leased by the state, the Regents of the University of California, or a local governmental agency.

(c) “Fossil fuel” means coal, kerosene, oil, wood, fuel gases, and other petroleum or hydrocarbon products, which emit carbon monoxide as a byproduct of combustion.

13263. (a) (1) The State Fire Marshal shall develop a certification and decertification process to approve and list carbon monoxide devices and to disapprove and delist previously approved devices, if necessary. The certification and decertification process shall include consideration of effectiveness and reliability of the devices, including, but not limited to, their propensity to record false alarms. The certification and decertification process shall include a review of the manufacturer’s instructions and shall ensure their consistency with building standards applicable to new construction for the relevant type of occupancy with respect to number and placement.

(2) The State Fire Marshal shall charge an appropriate fee to the manufacturer of a carbon monoxide device to cover his or her costs associated with the approval and listing of carbon monoxide devices.

(b) A person shall not market, distribute, offer for sale, or sell any carbon monoxide device in this state unless the device and the instructions have been approved and listed by the State Fire Marshal.

SEC. 4. Section 17926 is added to the Health and Safety Code, to read:

17926. (a) An owner of a dwelling unit intended for human occupancy shall install a carbon monoxide device, approved and listed by the State Fire Marshal pursuant to Section 13263, in each existing dwelling unit having a fossil fuel burning heater or appliance, fireplace, or an attached garage, within the earliest applicable time period as follows:

(1) For all existing single-family dwelling units intended for human occupancy on or before July 1, 2011.

(2) For all other existing dwelling units intended for human occupancy on or before January 1, 2013.

(b) With respect to the number and placement of carbon monoxide devices, an owner shall install the devices in a manner consistent with building standards applicable to new construction for the relevant type of occupancy or with the manufacturer's instructions, if it is technically feasible to do so.

(c) (1) Notwithstanding Section 17995, and except as provided in paragraph (2), a violation of this section is an infraction punishable by a maximum fine of two hundred dollars (\$200) for each offense.

(2) Notwithstanding paragraph (1), a property owner shall receive a 30-day notice to correct. If an owner receiving notice fails to correct within that time period, the owner may be assessed the fine pursuant to paragraph (2).

(d) No transfer of title shall be invalidated on the basis of a failure to comply with this section, and the exclusive remedy for the failure to comply with this section is an award of actual damages not to exceed one hundred dollars (\$100), exclusive of any court costs and attorney's fees. This subdivision is not intended to affect any duties, rights, or remedies otherwise available at law.

(e) A local ordinance requiring carbon monoxide devices may be enacted or amended if the ordinance is consistent with this chapter.

SEC. 5. Section 17926.1 is added to the Health and Safety Code, to read:

17926.1. (a) An owner or owner's agent of a dwelling unit intended for human occupancy who rents or leases the dwelling unit to a tenant shall maintain carbon monoxide devices in that dwelling unit consistent with this section and Section 17926.

(b) An owner or the owner's agent may enter any dwelling unit intended for human occupancy owned by the owner for the purpose of installing, repairing, testing, and maintaining carbon monoxide devices required by this section, pursuant to the authority and requirements of Section 1954 of the Civil Code.

(c) The carbon monoxide device shall be operable at the time that the tenant takes possession. A tenant shall be responsible for notifying the owner or owner's agent if the tenant becomes aware of an inoperable or deficient carbon monoxide device within his or her unit. The owner or owner's agent shall correct any reported deficiencies or inoperabilities in the carbon monoxide device and shall not be in violation of this section for a deficient or inoperable carbon monoxide device when he or she has not received notice of the deficiency or inoperability.

(d) This section shall not affect any rights which the parties may have under any other provision of law because of the presence or absence of a carbon monoxide device.

(e) For purposes of this section, with respect to a time-share project, “owner” means the homeowners’ association of the time-share project.

SEC. 6. Section 17926.2 is added to the Health and Safety Code, to read:

17926.2. (a) If the department, in consultation with the State Fire Marshal, determines that a sufficient amount of tested and approved carbon monoxide devices are not available to property owners to meet the requirements of the Carbon Monoxide Poisoning Prevention Act of 2009 and Sections 17926 and 17926.1, the department may suspend enforcement of the requirements of Sections 17926 and 17926.1 for up to six months. If the department elects to suspend enforcement of these requirements, the department shall notify the Secretary of State of its decision and shall post a public notice that describes its findings and decision on the departmental Internet Web site.

(b) If the California Building Standards Commission adopts or updates building standards relating to carbon monoxide devices, the owner or owner’s agent, who has installed a carbon monoxide device as required by Section 17926 or 17926.1, shall not be required to install a new device meeting the requirements of those building standards within an individual dwelling unit until the owner makes application for a permit for alterations, repairs, or additions to that dwelling unit, the cost of which will exceed one thousand dollars (\$1,000).

SEC. 7. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.
